

Abundance[®]

Targeted Solutions from Nature

Highly Concentrated Performance

Abundance[®] is a soil inoculant that improves plant performance by mobilizing nutrients, making them more available for plant uptake.

The proven combination of highly concentrated specialized plant growth-promoting rhizobacteria (PGPR) gives Abundance[®] its ability to increase availability of nutrients and other inputs.

Agronomic Microbials[™]

It's in the Formula

***Bacillus amyloliquefaciens* • 3 x 10⁸ cfu/ml**
Improves nutrient uptake and reduces abiotic stress. Grows in association with plant roots.

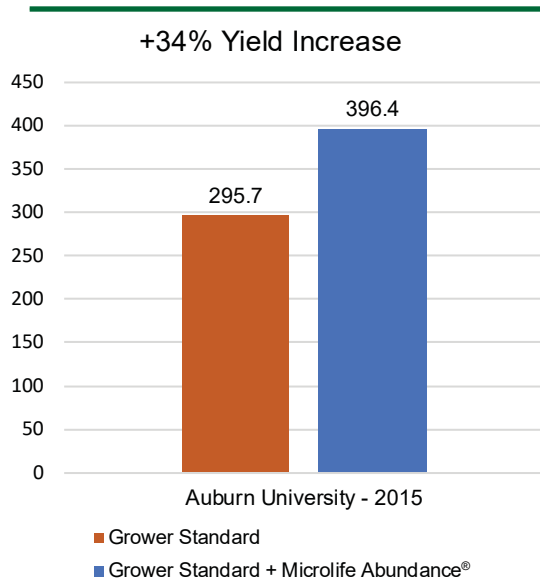

***Bacillus subtilis* • 3 x 10⁸ cfu/ml**
A specific strain that displays growth-promoting effects in conjunction with a fertilizer.

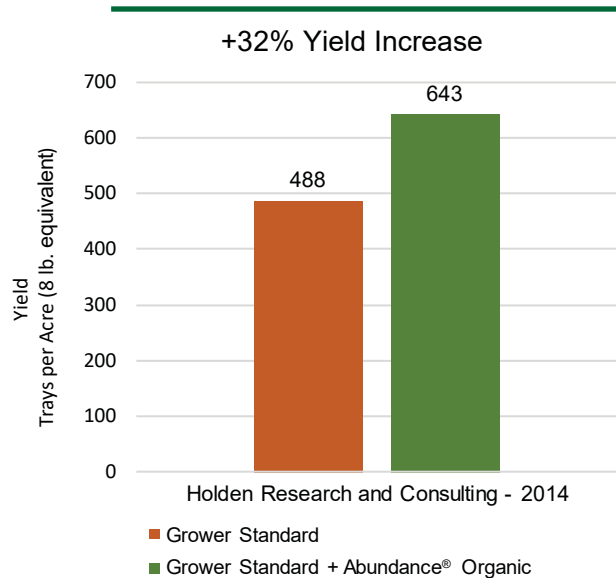

***Bacillus pumilus* • 4 x 10⁸ cfu/ml**
Promotes growth. Fast growing strain that effectively competes with other bacteria and frees up nutrients bound in organic matter and promotes solubilization of phosphate.
